

Pure Water, the treasure of life

Like diamonds, pure water is become rare. Physical, micro-biological and toxic impurities caused by increasing pollution have contaminated your drinking water. Also there are invisible impurities (dissolved) and hardness caused by salts that make water undrinkable. Bottled mineral water is expensive and inconvenient. In such a scenario it becomes difficult to keep your family away from the hazards of water born diseases.

But here is Clean Water to handle all your treatment related problems. The company believes in offering RO systems that stand by its philosophy Clean Water is an upcoming water treatment plant manufacturer that promises pure water to your family through its wide range of techno-savvy RO plants. The company offers high quality water treatment systems at competitive prices. So get ready for Clean water that ensures a new and healthy life to you and your family.

Clean Water Smart RO, giving you pure water

Clean water smart RO plant is specially designed for commercial and domestic use. its latest technology enables it to purify water in the best possible way. Smart is the smartest water purification system that removes dirt, dust and other impurities and makes drinking water purer than the purest.

RO, the technology ensuring pure water

UV plants deactivate bacteria and viruses present in the drinking water but they can not remove harmful chemicals and dissolved impurities present in it.

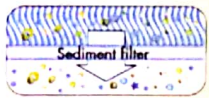

Reverse Osmosis plant popularly known as RO plant efficiently removes chemicals and dissolved impurities as it passes water through a semi-permeable membrane allows the water to you and your family.

Smart, for smartest water purification

- ▶ Removes impurities Clean Water ly and does not use chemicals
- ▶ Removes unnecessary salt and minerals
- ▶ Removes bacteria and viruses
- ▶ Enhances the taste of water
- ▶ Eliminates impurities that cause high blood pressure, kidney stones, indigestion, gastric bacterial diseases, etc.
- ▶ Saves money as you need not buy expensive and dubious bottle mineral water
- ▶ Even treats the water of bore-well and overhead tanks and makes it drinkable
- ▶ Can be used in homes, offices, hotels, restaurants, schools, colleges, hostels, clinics, hospitals, laboratories, etc.

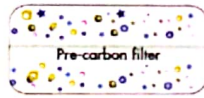

5 stage water purification system

1. Sediment filter
